

In the Specification

On page 4, line 34, please replace the equation shown with $m_i = \sum_{j=1}^n s_{ij}r_{ij}$. The

paragraph of the specification should now read as follows:

The generation of branch metrics is well known in the art, and are generally calculated as

$$m_i = \sum_{j=1}^n s_{ij}r_{ij}$$

where

$n=1, 2, 3, \dots$ is the number of the encoded symbols at the output of the encoder corresponding to one input bit;

$s_{ij} = + / - 1$, is the j^{th} symbol of the output of the convolutional encoder for the i^{th} state (or branch)

r_{ij} is the j^{th} symbol of the received sequence for the i^{th} branch (or state) of the convolutional decoder and

i represents the i^{th} state (or branch) of the decoder.

Respectfully Submitted,
CHEN ET AL.
